RANDELL & SAUNDERS

MAP

RANDELL & SAUNDER

OF THE

BATH FREESTONE

DISTRICT.

Bath Stone Office,
Corsham, Wilts.
August 1st, 1856.

GENTLEMEN,

We have the pleasure to annex a List of
Prices at which we can deliver BATH STONE.

You will see we have been enabled to make an important
reduction in the price for Stone delivered to several of the
Towns specified, which we trust will induce you to use the
Stone more extensively.

Finding great inconvenience arise from having different
terms of credit for Stone supplied at London and Bristol other
than for Stone carriage paid to country localities: in order to
bring these accounts under the same terms, we have reduced
our prices for Stone delivered at London and Bristol, and in
future wherever we deliver Stone, our terms will be monthly
account, *Cash* the 10th of the following month.

We shall be happy to supply Stone at the QUARRIES on
the usual terms, sincerely thanking you for past favors,

We are, GENTLEMEN,

Your obliged and obedient Servants,

RANDELL & SAUNDERS.

Messrs. RANDELL & SAUNDERS respectfully submit that the general advance on wages has increased the advantages of using Bath Stone in the place of other descriptions of stone, which are more costly to work ; and they believe it is to this circumstance they are, to some extent, indebted for the increased demand for their Bath Stone ; and the large quantity now required enables them to arrange their quotations at prices that would not otherwise compensate for the cost of quarrying.

Machine-worked Mouldings supplied the Trade
at moderate Prices.

Patent Facing sawn and dressed ready for firing, this can be attached after the building is erected, and by its adoption a stone front can be secured at a cost not much exceeding that of cement.

GENERAL DESCRIPTION

OF THE

VARIOUS KINDS OF BATH STONE.

THE principal supplies of Bath Stone are obtained from Combe Down, Corsham Down, Box Hill, and a little is still brought from Farleigh Down.

COMBE DOWN STONE

When properly selected, is an excellent weather stone, and can be used with safety for Plinths, Copings, &c., in any situation.

The best quality works easily, but the blocks cannot always be obtained free from Bars and Vents which constitute the chief defects in this stone. The beds vary from 10 inches to 4 feet 6 inches in thickness, and are occasionally found as much as 6 feet thick. Blocks of great length or size cannot always be procured in this stone; but there is generally no difficulty in getting them from 5 to 6 feet in length, and sometimes longer if required. The average size of the blocks is about 15 cubic feet.

CORSHAM DOWN STONE

Is usually free from the Bars and Vents which are found in the Combe Down, and being a particularly sound stone, blocks can be obtained of any moveable dimensions. The beds vary from 1 foot to 4 feet in thickness. This stone is finer in texture and more regular in quality than any other description of Bath Stone; it works cheaply; and is well adapted both for external and internal purposes (excepting Plinths, for which a coarser stone is generally preferred). Below the beds of fine stone are two beds of harder quality distinguished from the finer by the name of Corn Gut. This stone is equally good in colour and quality, but, on account of its hardness, cannot be economically used for any purposes on which much labour is required. For heavy work it is very suitable, and also does well for steps and landings. One of these beds is usually 2 feet 9 inches deep; the other, 4 feet to 4 feet 6 inches.

Corsham Down Blocks average 24 cubic feet. (See Analysis of this Stone, at next page.)

FARLEIGH DOWN STONE,

Is some miles distant from rail or water carriage. The upper beds vary in thickness from 10 inches to 2 feet 6 inches, and are distinguished as the white beds. The bottom bed is coarser in

texture than the upper beds, and is of a reddish hue. This bed is supposed to stand the weather better than the white beds, which are more suitable for internal purposes.

The average size of Farleigh Down Blocks is 14 cubic feet.

BOX GROUND STONE

Is coarse in texture but sound in quality, and a good weather stone. It is harder than the Combe Down stone, but being less subject to Vents, it works at less cost. It is taken from the same hill as the Corsham Down, and can be obtained in blocks of considerable dimensions. The beds vary from 1 foot to 4 feet in thickness.

The average size of the blocks is 20 cubic feet.

ANALYSIS OF THE CORSHAM DOWN STONE.

" King's College, London,

" May 12th, 1849.

" GENTLEMEN,

" I beg to transmit to you the results of the Analysis of the sample of Stone which you left with me for that purpose.

" The Stone in question was an Oolitic Limestone, presenting the usual characters of the Bath Stone. It had a specific gravity of 2.45. The composition of the Stone was as follows:—

" Carbonate of Lime	96 . 60
" Carbonate of Magnesia	1 . 57
" Silica	0 . 90
" Peroxide of Iron, with a little Alumina				0 . 90
				<hr/>
				" 99 - 97
				<hr/>

" I have the honor to be,

" Gentlemen,

" Your obedient Servant,

" WM. ALLEN MILLER, M. D.,

" *Professor of Chemistry.*

" To Messrs. RANDELL and SAUNDERS,

" BATH."

QUARRY PRICES.

BLOCK.

	s.	d.
Corsham Down, delivered into Trucks at Corsham, per foot cube	...	0 7
Combe Down, ditto at Bath	...	0 7½
Box Ground Stone, ditto at Box or Corsham	...	0 6
Farleigh Down, ditto at Box	...	0 7
Corn Grit, ditto at Corsham	...	0 5

Selected Blocks, 1d. per foot extra.

Blocks, of large dimensions, or cut to order, supplied at a moderate increased cost.

LANDINGS.

Four inch, under 24 feet	...	per foot super.	0 3½
Ditto, above 24 feet	0 4½
Six inch, under 24 feet	0 4½
Ditto, above 24 feet	0 5½

PAVING.

Three inch, Corn Grit	...	per foot super.	0 3
Ditto ditto, Corsham Down	0 3

RANDOM ASHLAR.

Corsham Down Ashlar, from 4 to 8 inch, supplied at the same price per foot cube as Block, cut to given courses, at a small extra charge.

RANGE STONE.

Sawn Range Stone, Corsham, per yard	1 9
Ditto, Box ground	2 0

This Stone is cut to range in courses, 4, 5, 6, 7, and 8 inches deep, and varies from 3 to 7 inches wide, 5 yards make a ton.

Patent Facing sawn and dressed ready for fixing.

Worked Stone supplied to the Trade.

Wall Stones, One Shilling per Ton.

PRICES OF BATH STONE DELIVERED.

MESSRS. RANDELL & SAUNDERS subjoin a list of prices, at which they can now undertake to deliver Bath Stone, at the several places named, on the following terms and conditions:—

In all cases the stone must be unloaded by the purchaser; when stone is delivered per Vessel, the delivery is completed on the vessel being moored alongside—or if by Railway, on the truck reaching the Station to which it is consigned.

When the stone reaches per Vessel, the craft must be discharged within the time stated on the Bill of Lading, or demurrage paid as per the same.

When the stone reaches per Railway, the truck must be unloaded on the day of arrival, or, at latest, on the following day; in default of which a charge for demurrage will be incurred.

The Terms are three months on approved reference on all Stone supplied at the Quarries, or Cash less $2\frac{1}{2}$ per cent. discount. If Stone is freighted, the amount of freight will have to be paid by the purchaser as soon as the craft is discharged, but in all cases where we deliver Stone, in consideration of our paying the carriage, our terms will be monthly account, *Cash* the 10th of the following month.

Random, Ashlar, and Random Quoins, can be supplied at the same price per foot cube as block.

Remittances can be made by cheques to the Order of R. & S. BANKERS;—Messrs. Moger, Son, and Jones, City Bank, Bath; Messrs. Barclay, Bevan, and Co., 54, Lombard Street, London.

For reference, the Counties are numbered as under:—
